KNAPSACK BATTERY POWER SPRAYER

OPERATION INSTRUCTIONS

1. Before using

(1)Please charge the battery in the same environment temperature of 0°C to 35°C.
(2)Fix the fuse up and spray clean water before you use it for the first time.
(3)Spray and clean the machine under the power of water; when working with water, please make sure water pressure is within 0.20-0.40 MPa.
(4)Please don’t use water-insolube powder. Because it will not melt into water.
(5)Please wipe it up if the medicine overflow when you increase the spraying rate.
(6)It is forbidden to use strong acid, strong kali, inflammable liquid or any other special liquid.
(7)Power switch turn to spray when stop working.
(8)This machine is forbidden to be used by those who is mentally ill or handicapped.
(9)Power switch turn to stop when recharging the battery. Please recharge timely to guarantee the life of battery.

2. Method of usage

(1)When the battery is fully charged, the machine starts and the machine pressure reaches the highest, and the pressure不会再 increase when you spray the medicine; please remove the battery or the electrical device and dry cleaning tool; the battery will be automatically disconnected when the battery is overcharged.
(2)Fix the fuse up and spray clean water before you use it for the first time.
(3)The mixed medicin should pass through the filter before it goes into the machine for spraying.
(4)After working, you must clean the machine with clean water, more times in case wasting soup.
(5)After working, you must clean the machine with clean water, more times in case wasting soup.
(6)Please match the real electric connecting draft when you use this product, which can help you to avoid short circuit or damage the motor.
(7)Power switch turn to spray when recharging the battery. Please recharge timely to guarantee the life of battery.
(8)Please use the attached plastic device when you need to use water as the power source of the sprayer.

3. Maintenance

(1)Clean up the dust and dirt on the machine; do not take any harmful chemicals; leave the machine where there are no direct sunshine and children.
(2)You must discharge and recharge the battery every two months.
(3)The mixed medicin should pass through the filter before it goes into the machine for spraying.
(4)Wash the filter and the pump after every use.
(5)Please wipe it up if the medicine overflow when you increase the spraying rate.
(6)It is forbidden to use strong acid, strong kali, inflammable liquid or any other special liquid.
(7)Power switch turn to spray when stop working.

4. Technical parameter

- Model: 16MP
- Machine Power: 80W
- Battery Capacity: 16L
- Rechargeable: 8 hours
- Power: 220V
- Spraying Pressure: 0.20-0.40 MPa
- Capacity: 16L
- Weight: 16kg
- Size: 700x300x800mm
- Nozzle Type: Pressure/Mpa Flow rate (L/min)

5.atmosphere

- Working pressure: 0.20 MPa-0.40 MPa
- Capacity: 16L
